

# TAD1000HCU

**CAGE CODE: Z8364,**

**NSN: 4120-66-154-4323**

- The TAD1000HCU provides operators the ability to control temperature and humidity independently.
- The unit is designed to cost-effectively treat 100% makeup air and can work in conjunction with your existing A/C system.
- It controls humidity on an as-needed basis, when humidity levels exceed set point.
- The TAD1000HCU combines the benefits of desiccant dehumidifiers with the cooling of DX air conditioners to pre-treat make up air before it is brought into a building.
- The unit has a microprocessor to supervise and control all internal functions.
